Indian Institute of Technology Roorkee

Education

Year	Degree/Examination	Institution/Board	CGPA/ Percentage
2026	B.Tech. 2nd Year	Indian Institute of Technology, Roorkee	7.217
2024	Intermediate (Class XII)	Green Valley International School	91.20 %
2022	Matriculate (Class X)	Old Lady of Fatima Secondary School	93.80 %

Entrepreneurship

Co-Founder | Trido Rentals (trido.in)

- Co-founded **Trido Rentals**, a two-wheeler rental marketplace solving unreliable rentals in India's hill-station towns
- Took the platform from idea to launch in **7 days**, building the product in-house and owning end-to-end execution
- Drove growth through travel-creator partnerships, serving **1,000+** customers and generating **$10,000+** in revenue
- Led product, operations, partnerships, and growth, scaling to a best month of **$4,000+** revenue from paying users

Internships

Founders' Office Intern | HeadsUp AI — May 2026 - June 2026

- Built niche SaaS products at HeadsUp AI, owning product development, GTM strategy, and growth across **5+** AI products
- Led product strategy for the highest-performing application, driving user research and growth to **10,000+** users
- Directed go-to-market execution through competitor benchmarking and content strategy across **4+** product launches
- Orchestrated monetization and growth initiatives by collaborating across verticals to accelerate product adoption

Market Research Intern | DGTLmart — July 2025 - September 2025

- Enabled brands to discover and collaborate with **10,000+** creators through a centralized influencer marketing platform
- Researched creator economy trends and **15+** competitors to design brand funnels with **20+** product initiatives
- Developed a **90**-day GTM roadmap and monetization strategy across SaaS, API, and commission-based revenue models

Projects

Overrun: LLM Cost Meter & Tokenizer Study | overrun-ashy.vercel.app — October 2026

- Built a browser tool that estimates LLM costs, validates provider usage, and enforces budgets with integer-only pricing
- Measured the 4-characters-per-token rule on **200** samples, **10** languages, and **4** tokenizers; it undercounts Tamil by **5.35×**
- Ran **50** live API calls; found a **71-token** hidden overhead per request that explained **100%** of the held-out gap

Retrace: Time-Travel Debugger for AI Agents | retrace-debugger.vercel.app — September 2026

- Built a Python debugger that records every LLM and tool step of an AI agent, then replays, forks, and diffs runs
- Seeded **10** bugs across **5** failure types; the diff located the exact faulty step in **10/10** cases against a mutation log
- Made replays safe: byte-identical across **10** recorded runs, side-effecting tools blocked; shipped a web viewer

Zomato: Improving Customer Retention & Daily Engagement | E-Cell IIT Roorkee — June 2025 - July 2025

- Analyzed a **3.1 Cr TAM** and user research to identify retention opportunities among urban working professionals
- Developed a subscription-led product strategy projected to unlock **8,928 Cr** annual revenue at **10%** market penetration
- Prioritized **6** product initiatives using the **RICE** framework, maximizing retention, engagement, and repeat orders

Consumer-Centric Positioning & Pricing for an Electronic Accessories Brand | Self Project — July 2025 - August 2025

- Investigated pricing inefficiencies by sizing a **31,087 Cr** market and identifying growth opportunities through analysis
- Validated tiered pricing through **302** surveys, **ANOVA**, and **Van Westendorp** analysis to optimize willingness-to-pay
- Established a three-tier pricing model, multi-channel GTM strategy, and export roadmap to **2,000 Cr** revenue by 2027

Forecasting Ride Demand to Optimize Uber's Fleet Utilization | E-Cell IIT Roorkee — May 2026 - June 2026

- Forecasted Uber demand across **30** geospatial zones at **15**-minute intervals using spatiotemporal feature engineering
- Integrated MiniBatch KMeans, MLflow, DagsHub, and Streamlit to build an end-to-end forecasting pipeline efficiently
- Scaled model training by processing **100,000-row chunks** and deploying a production-ready demand prediction system

Market Capitalization Forecasting with Deep Learning | E-Cell IIT Roorkee — September 2025 - November 2025

- Predicted **1Y, 2Y, and 3Y** market cap growth for Indian firms using **28** financial indicators with **<20 RMSE** in best model
- Benchmarked MLP, LSTM, Transformer, and **Multi-Horizon** TCN; TCN with attention achieved lowest RMSE across targets
- Implemented preprocessing, feature scaling, outlier handling, and **SHAP/LIME** explainability to improve model reliability

Retail Inventory Inefficiency Diagnosis & Optimization Strategy | E-Cell IIT Roorkee — May 2026 - June 2026

- Analyzed **954** demand-supply records to identify inventory imbalances, stock shortages, and product-level demand trends
- Built **SQL** analytics using joins and window functions to monitor **149** low-stock alerts and **150** ageing inventory records
- Recommended inventory optimization strategies by analyzing **88** stockout cases and **31,215 units** at risk of shortage

Positions of Responsibility & Extra Curriculars

Convener | E-Summit'27 IIT Roorkee — May 2026 - Present

- Leading a **120+** member team and coordinating with key stakeholders to organize IIT Roorkee's Entrepreneurship Fest
- Secured strategic partnerships with top firms to host domain-specific workshops promoting inclusive learning and growth
- Launched a Campus Ambassador Program in **50+** colleges, driving nationwide events and attracting **3,000+** participants
- Orchestrated speaker sessions & panels with founders, VCs, & experts, leading end-to-end content planning & execution
